

Response to Amendment

1. This Office action is in response to the reply filed on January 24, 2011.
2. In the aforementioned reply, applicant notes that "one skilled in the art would understand the meaning and scope of the claims" and refers the examiner to the figures and the originally filed specification for additional information and/or a definition of the limitations "a desired high-pressure value", "a correcting characteristic", and "a pilot control characteristic" which were identified by the examiner in the Final Rejection mailed on April 14, 2010 as not being clear and as not having been clearly defined, noting that "it is not clear what is encompassed by the [aforementioned] limitations". However, a careful review of the originally filed specification and of the drawings fails to clarify these terms.

Requirement Under Rule 105

This waiver extends only to those documents within the scope of this requirement under 37 CFR 1.105 that are included in the applicant's first complete communication responding to this requirement.
